FLORIDA.—A correspondent of The Talla-

SOUTH CAROLINA .- The corn crops are far UTH CAROLINA.—The corn crops are lat-than last year, and though they have suffered from the of some three weeks duration, and the yield y has been materially diminished, yet the majerity planters will make an abundance of provisions, esent cotton crop is growing fliely, and looks well, her from grass; but owing to the general inability are guano this season, is similer, and cannot be ted to produce as much to the acre as it did the

where so lately stood the beautiful crop. Thousands or dellars have been lost in our immediate vicinity, and it would be almost impossible to calculate the loss for a distance of 60 miles cach way.

LOUISIANA.—In Greensburg parish the crops are looking well on account of the rain. The rumor in relation to the much-dreaded army worm has abated, though serious fears are entertained that if this moist weather continues it will aid materially to their great immensioner in late in the state of the loss of the parish: the cotton crop looks finely. A week or two of sunshine will now make the fields white with the staple, and a good picking will be had early in September. No alarm about the catepilite as yet. In St. Landry Parish cotton crops up to this time have done remarkably well, and the plant is not only loaded as heavily as it can bear with bolls, but confinees to flower and form to the very top of the stalk. We may remark that before the 18th of this month, last year, many fields were swarming with the young caterpilite in the Sunter Sour, Hall & Yanderpool for defendant.

The following decisions have been rendered in the Synthesia spire and rank, except in the back land, where it was a first out and the spiritify and the blant of this month, last year, many fields were swarming with the young caterpilite in the Synthesia of the 29th says: Almost too much rain has aircady fallen in several places for the soction. The plant is growing large and rank, except in the back land, where it was a second of the 29th says: Almost too much rain has aircady fallen in several places for the soction. The plant is growing and first the says and the back land, where it was a second of the 29th says: Almost too much rain has aircady fallen in several places for the soction. The plant is growing and rank, except in the back land, where it was a second of the 29th says: Almost too much rain has aircady fallen in the say and the same of the parts. The plant is growing and rank, except in the back land, where it was a first of the dry weather. There is some uneasiness among planters with regard to the worms. The rain and cloudy weather have excited their fears; but, thus far, the various rumors The corn crop is cut very short, particularly on the hills, where it is almost a complete failure. The young corn, planted within the last month, is looking well and vigorous.

ALABAMA .- A correspondent of The Montgomery Picayune says: "A personal inspection of the corn crop in several parts of Lee County satisfies us that this county will not make more than half the amount of corn required for home consumption. The cotton crop is better, but the plant is sather small. If the present rains continue, It will be seriously injured. In Macon County the recent rain has proved very beneficial to every crop. The corn crop had already been very much injured by the long droutil, but even it will be sided. In Butler County complaints are being made concerning boil worms and caterpillars. In Green County the corn has been greatly benefited by the rain, but there are apprehensions that it will be 160 much for the cotton, which, it is believed, will be much lighter than had been expected. In Madison County cotton is looking well in this section, and, with proper care and labor, will produce well. In Sainter County the corn crop is improving rapidly, and the cotton crop is regarded as quite satisfactory; strong hopes are entertained of a good yield. In Dallias County, the cotton crop is generally better than it is supposed by most persons to be. The plant is small, but well filled. The corn crop will not give a very large yield. It is estimated that the Btate will raise \$40,000,000 worth of cotton this year.

Mississippi.—The Natchez Democrat says: The orn crop in several parts of Lee County satisfies us that

being made contenting bell were and categorisms. If the section and categorisms are contenting bell were and categorisms. If the content is given country the corn has been greatly beinding by the previous will be seen likely and the corn deep section of the corn the corn deep

has put on the dark green hue of prosperous growth. Cotton has not suffered at all by drouth, and it has con-tinued to grow uninterruptedly.

CANADA.—The wheat crop generally promises to be ever an average crop, and most of its ready for reaping. Hay is turning out better than was expected, and is of excellent quality, and well saved. Barley will and is of excellent quality, and well saved. Barley will not be up to the average, and outs and peas are nowhere, both being burnt up by the heat. In the townships of Hailey, Barnston, and Stanstead, when it was apparent that their crops were short. The English papers state townships of Hailey, Barnston, and Stanstead, when it was apparent that their crops were short. The English papers state townships of Hailey, Barnston, and Stanstead, when it was apparent that their crops were short. The English papers state townships of Hailey, Barnston, and Stanstead, when it was apparent that their crops were short. The English papers state townships of Hailey, Barnston, and Stanstead, when it was apparent that their crops were short. The English papers state townships of Hailey, Barnston, and Stanstead, when it was apparent that their crops were short. The English papers state townships of Hailey, Barnston, and Stanstead, when it was apparent that their crops were short. The English papers state town to a season, Bromses well, as do also barley and outs. Hops and corn are looking well; but, owing to the long-continued drouth, postation of the woods to tooling and holders are also and back wheat any prove almost a total radiure. In the Christian Hailey, Barnston, and Stanstead, when it was apparent that their crops were short. The English papers state town the state of the short of them should immediately exchange them for its down in a desiration of the same of 60 king and outs. Hops and outs and peas are nowhere, when it was apparent that their crops were short. The English papers state the country has not experienced such that the drouth has been most severe, and that for them should immediately exchange them for its down in a desired the constraint of the same of 60 king and the state of the same of 60 king and the eknowledged facts it appears strange that the Wheat crop should be superabundant and extirely maffected by the heat, and it will undoubtedly prove that the crop will be of light weight, and that the necessities of the country will compel them to beome heavy purchasers of our cereals at any price. In France and the other parts of the continent the drouth has been severe, but not to the extent that it was in England. The French Government have already suspended the duty on breadstuffs for three months. This means one of two things-a war or a short crop. Shrewd men well posted say that it seans the latter, and our farmers should not be haried into selling their grain on the report of an exessive crop in England, but await the returns of the harvest, which is now completed, and see what the real state of the case is. Should this state of facts prove true, as undoubtedly it will, the farming and railway interests of the country have a prosper ous season opening before them, with at least 20 per cent heavier crops than last year. Our trunk roads will be taxed to the utmost at paying rates in transporting our surplus to the seaboard, and the farmers have a good market for all their produce at good prices. The great demand for hay will necessitate the use of the new method of compressing, as the high rates of freight by rail will not prevent shipping the present loose bales. Providence has blessed us with a full store, and also opened a market for our

The following is a statement of coal transported on the Delaware and Hndson Canal for the week ending

An second bonds, de, shall be exempt from laxation," still covers only the ground of the Supreme Court decisions. The object and good effect of putting it in the act was to instill the fact into the public naind. Having established the fact that United States bonds cannot be taxed by, or under State authority, I will glaine at the power of the General Government to tax its own securities. Incomes arising from United States bonds are taxed now just as incomes are which arise from other sources. Any attempt to tax such bonds in excess of other analogous investments is carefully guarded against by the Constitution. In section 8 of Article L, of this instrument, we find the following: "Congress shall have the power to levy and collect taxes, duties, impasts, and excises, to pay the debts, and provide for the common defense and general welfare of the United States. But all dities, imposts, and excises, shall be uniform throughout the United States." This clearly forces any man who is imbued with the spirit of equity, to the conviction that currency arising from the United States bonds cannot be taxed in excess of incomes arising from other interest-bearing investments.

The Chicago Republican of Monday Says:
Last week closed quiet is financial circles, and there are no new features worths of recard. There has been a slight improvement in the femant for money furing yesterplay and to-day, but this is only tempers, being accessioned by the expiration of the month, when merchants natione their accounts. There has also been a good demand from grain rices for the settlement of contracts expiring at the end of the month. Extendible for the month is the set of interest remain steady and without change, notwithstanding there is a perfect size of money at nearly all our knows. Call loans on lower money at reality all our knows. Call loans on for the perfect of the former at nearly all our knows.

The Detroit Tribine of Thesinay Says:

as a rule, and although choice short dated notes are taken in some cases at the percent, yet some hanks continue to charge their contourers from the 7 percent, which they deem but a fair rate. The demand for call some is very size. The rate is nominally 4 to 5 per cent, but many of the banks are unable to do as much as they would like even at the lower

The first hale of cotton of the erop of 1003 was received in this city esterday by T. W. House. It was raised on the plantation of Col. M. I. ruke, of Grunes County, weights 400 pounds, and is classed as good ciddling. Col. buke is, therefore, the winner of the prine, a massive rep which was offered by Mr. House to the person sending the rat hale of cotton of this year's crop. And Houston is again shear of Galveston.

The Philadelphia Inquirer of Tuesday says:

There is a superaloudance of maner seeking employment, which is diffenit to place even at the low rates of discount new ruling, viz. 4 %5 4 peers an Government, and 54 %6 4 peers and upward on miscellaneous securities. There is no increase in the amount of prime mercantle paper, which is remarkably small for this season of the year. This may be regarded a reflex of the dull and unroduable condition of business.

It is asserted on trust-worthy authority that the Boston, Hartford and Eric Haifrond Company have completed the safe of \$5,000,000 of their first mortgage bunds, receiving \$2,000,000 in cash, and the remainder as it shall be wagted in the progress of the work. These bonds not the Company \$4,000,000. Commodore Vanderbilt has shown his interest in the early completion of this road by taking one-quarter of this loan. The aid of \$3,000,000 by the State of Massachusetts is by this loan secured, all the provisions of the act necessary to be compiled with having been fully met by the Company. The two loans, amounting to \$5,000,000. Provision of this food is only in the provision of the act necessary to the company.

The earnings of the Chicago, Rock Island and Pacitic Road for the fourth week in July were:

six per cent gold bonds at 971 per cent and accrued

The road extends from St. Louis 283 miles to Kansas City, there connecting with the Union Pacific Kailroad (E. D.) and other roads, and was completed in 1865, at an expenditure of over \$13,000,000. The earnings for the year ending Febru-

Net earnings.... While for the first quarter of 1868 the net earnings

second those of the same quarter in 1867 by \$133,679 69. The Railroad Company, in order to pay off the State of Missouri for advances in aid of constructing the road, as well as all other liens, has issued \$7.000,000 of First Mortgage 6 per cent bonds, secured by deed of trust to Messrs, James Punnett, President of Bank of America, New-York, U. A. Murdock, President of Continental National Bank, New-York, and Luther C. Clark of Clark, Dodge & Co.

The bonds run twenty years from Aug. 1, 1868, interest February and August in New-York. Principal

In offering these bonds to the public we remark hat the road passes through the central, most popuous, fertile and growing part of the State of Misouri, forms part of an important line, and is completed and successful enterprise, already earning nearly double the amount required to that the road passes through the central, most populous, fertile and growing part of the State of Misa completed and successful enterprise, already earning nearly double the amount required to meet the interest on its entire indebtedness, thus entitling the bonds to the rank of a first-class security. Government and other securities received in exchange at market rates, Clark, Dodge & Co., No. 51 Wall-st. THE STATE OF TRADE.

ST. LOUIS AND IRON MOUNTAIN RAIL-BONDS, FEBRUARY'S SEVEN PER CENT PIRST MORTGAGE BONDS, FEBRUARY and ADURST COUPONS.—The earnings of the completed road to Filled Kinds are more more than the interest on the earlier mortgage. The proceeds of these Bonds are adding to the security every day. Over #8,000,000 have been spent on the property, and not over \$1,000,000 of bonds issued thus far. The centainty increasing trailic of carrying Ore, with the prospect of controlling all the travel from St. Louis to the Southern Mates, insures an coordinate revenue. The Directors sowed-10 of the stock for investment, and are interested to curich the property as well as to economies its expenses.

The Directors own #-10 of the stock for investment, and are interested to earlich the property as well as to economies its expenses.

We, the undersigned, continuity recommend these seven per cent mortgops bonds, of the St. Louis and Iron Mountain Baltrood, as a pool seconomy. The revenue of the road will be large, and the administration of the affairs of the Company is in engales and experienced lands, and is anticied to the greatest confisionce of the public:
